VLADIMIR RADEV

Blockchain Developer | Solidity | Web3 Full-Stack

Sofia, Bulgaria | +359 879 324 734 | vladimiradev@gmail.com | linkedin.com/in/vladimir-radev-8730321b6 | github.com/VladimirRadev

Professional Summary

Blockchain Developer building EVM smart contracts and full-stack Web3 dApps: Solidity with Foundry, Hardhat and OpenZeppelin (ERC-20, ERC-721, ERC-1155), DeFi protocols (AMM, staking, lending), smart contract security and testing, and blockchain integration with TypeScript, React, Next.js, Node.js, wagmi and viem. Almost 2 years as a Web Developer & ERP / Odoo Integrator (Python / Django, REST APIs) for 10+ clients. Open to work since Aug 2026.

Skills

Smart contracts: Solidity, EVM, Ethereum, Foundry (forge, anvil), Hardhat, OpenZeppelin v4 / v5 (AccessControl, upgradeable), UUPS / transparent proxies, timelocks; token standards ERC-20, ERC-721, ERC-1155, ERC-2612, ERC-3009, ERC-3643 (T-REX security tokens, RWA tokenization); DeFi (AMM, staking, lending), Uniswap V3, Gnosis Safe multisig; smart contract security (role-based access control, price-manipulation guards, commit-reveal randomness); applied cryptography (EIP-712 typed-data signatures, ERC-2612 / ERC-3009 permits, SIWE); Etherscan / Sourcify verification

Blockchain infra: Ethereum mainnet & Sepolia testnet, Avalanche L1 / Subnet-EVM, Cosmos SDK (Go), EVM event indexers (custom, Ponder), Infura / Alchemy RPC, Blockscout, IPFS, SIWE, wallet integration (WalletConnect, RainbowKit, Keplr)

Backend: Python (FastAPI, SQLAlchemy async, Alembic, Pydantic, Celery, Django), TypeScript / Node.js (NestJS, Express, Fastify, tRPC, Drizzle ORM, zod), Go (chi, pgx, gRPC), REST API / OpenAPI, WebSockets

Frontend: React 19, Next.js 15 / 16 (App Router), TypeScript, JavaScript, wagmi, viem, ethers.js v6, web3.js, Tailwind CSS v4, shadcn/ui, TanStack Query, Vite, Vue 3, HTML5, CSS

Data, DevOps & Testing: PostgreSQL, Redis, Supabase, SQL, Docker / Docker Compose (containerization), Git, GitHub Actions CI/CD, Cloudflare Workers, nginx, Prometheus, Bash; testing with Foundry unit / fuzz / invariant tests, mainnet & Sepolia fork tests, coverage gates, Hardhat + mocha / chai, Vitest, Jest, Playwright, pytest

ERP & Integrations: Odoo Enterprise 18 / 19, REST APIs, e-commerce & delivery integrations (Econt / Sameday / Speedy), business process automation

Programming languages: Solidity, TypeScript, JavaScript, Python, Go, SQL, Bash, C++ (OOP, data structures & algorithms); familiar with Rust and Java

Work Experience

Blockchain Developer — Independent projects (open to work) **Aug 2026 – Present**

- Designed and deployed 10 Solidity smart contracts on Ethereum Sepolia: ERC-20 token with role-based minting and a faucet, constant-product AMM, MasterChef-style staking farm, lending / credit protocol, ERC-1155 item shop, on-chain game and arcade, voting oracle and prediction market.
- Built 6 React / TypeScript dApps with wagmi and viem and shipped them to GitHub Pages through GitHub Actions CI/CD pipelines.
- Tested the contracts with Foundry unit, fuzz and invariant tests and executed 25+ on-chain integration transactions on Sepolia.

Web Developer & ERP / Odoo Integrator — Industria Technology **2024 – Jul 2026**

- Delivered 10+ client ERP implementations on Odoo Enterprise 18 and 19, including customizations and custom module development.
- Integrated 3 delivery & logistics APIs (Econt, Sameday, Speedy) into client e-commerce and ERP workflows.
- Developed REST APIs and third-party / e-commerce integrations, Django web applications, business process automation and database integrations across almost 2 years of client work.

Intern — Nemetschek Bulgaria (Internship Program) **2019**

Projects — Stellar, personal Web3 suite on Ethereum Sepolia (2026)

Stellar is a personal portfolio brand (not the Stellar/XLM network).

- 10 verified Solidity contracts, 6 React/TypeScript dApps, CI/CD with GitHub Actions, 25+ on-chain integration transactions on Sepolia.

Stellar Faucet | vladimirradev.github.io/Stellar-Faucet | Repo: github.com/VladimirRadev/Stellar-Faucet

- ERC-20 token "Vladimir ($VLAD)" with role-based minting (OpenZeppelin AccessControl) and a cooldown faucet; Foundry tests, Sourcify / Blockscout verification, React + wagmi + viem dApp on GitHub Pages.

Stellar Swap & LP Staking | vladimirradev.github.io/Stellar-LP-Staking | Repo: github.com/VladimirRadev/Stellar-LP-Staking

- Own constant-product AMM (ETH/VLAD, 0.3% fee, LP token) and a MasterChef-style staking farm emitting VLAD rewards; invariant-style forge tests.

Stellar Bank | vladimirradev.github.io/Stellar-Bank | Repo: github.com/VladimirRadev/Stellar-Bank

- DeFi credit protocol: VLAD savings with on-chain interest accrual, ETH-collateralized credit lines (LTV, health factor, liquidation), AMM-based price feed with same-block manipulation guard.

Stellar Store | vladimirradev.github.io/Stellar-Store | Repo: github.com/VladimirRadev/Stellar-Store

- ERC-1155 game-item shop paid in VLAD, role-gated consume / award for the game, metadata hosted on GitHub Pages.

Stellar Arena | vladimirradev.github.io/Stellar-Arena | Repo: github.com/VladimirRadev/Stellar-Arena

- Provably fair "play for keeps" on-chain game: commit-reveal + blockhash randomness, prize pool, item boosts from the store, canvas front end, plus a 29-cabinet provably fair arcade (5 game kinds, shared prize pool).

Stellargon | vladimirradev.github.io/Stellargon | Repo: github.com/VladimirRadev/Stellargon

- Polymarket-style prediction market on real-world events, paid in VLAD: parimutuel pools, implied odds, 2% fee to the Arena prize pool, human voting oracle where reporters stake VLAD and the minority is slashed.

Education

Master's degree (MSc) — Mechatronics & Robotics **2024 – Jun 2026**
Sofia University, Faculty of Mathematics and Informatics (FMI)

Bachelor's degree (BSc) — Software Engineering **2020 – 2024**
Sofia University, Faculty of Mathematics and Informatics (FMI)

High school diploma — Mathematics **2015 – 2020**
National High School of Natural Sciences and Mathematics, Sofia

Certifications

Odoo 18 Certified Professional

Languages

English (Fluent) | Bulgarian (Native)
